

Top 3 Dentist

Dr. Privett's practice has come a long way from the small office on Texas Avenue in Bryan to the larger office and staff on Rock Prairie Road. While the southern part of College Station continued to grow, there was an increase in demand for family dentistry. Every day on his way home from the Texas Avenue location, Dr. Privett would pass by a vacant corner lot on Rock Prairie Road. He recognized the potential and we opened our Rock Prairie location in October 2003. Dr. Privett has been practicing dentistry in the Bryan/College Station area since 1983. He has over 30 years of experience and has always kept up with the times and the innovative technology and changes for the better that come along with it.

Heart of Texas Dentistry offers the latest in dental care for all ages. Dr. Privett and his staff routinely participate in continuing education courses, which allows for us to keep up with the latest top of the line products, technology and techniques used to provide the best dentistry available. Treatments provided by our office include preventative, restorative and cosmetic procedures.

Our friendly and knowledgeable staff is thrilled to assist our patients with anything they might need. We like to remind our patients that we are here to work with them, not on them. Our front office staff greets our patients with a smile. They are happy to help schedule appointments that work

with a patient's schedule, explain insurance benefits, and work up estimates if treatment is necessary. Our dental hygienists are very thorough and personable. Our dental assistants are knowledgeable and excellent at explaining dental procedures if any questions should arise. The clinical staff is known for creating a comfortable and stress-less atmosphere for patients who may suffer from a little dental anxiety. Then there's Dr. Privett. His cheerful banter, outstanding chair side manner and exquisite abilities in dentistry are what tie this family of dental professionals together at Heart of Texas Dentistry.

Everyone here does their very best to accommodate our patients and friends. We strive for excellence in order to arrive at the best end result and most pleasurable patient experience. Whether it is meeting a patient with a toothache on the weekends, scheduling early morning appointments, or staying later in the evenings, we will always make sure a patient is well taken care of. Dr. Privett and his staff are grateful and feel very blessed to be recognized as a favorite among many excellent dentists in the Bryan/College Station area.
